

Case 15: Operational risk

The company " ProizvodstvoInvest " is considering the possibility of investing in new production. They are concerned about the risks associated with operations.

Questions:

1. What risks may arise in the operating activities of a new production?
2. What factors should be considered when assessing operational risks?
3. What risk management strategies can ProizvodstvoInvest use to reduce the impact of operational risks on a new production facility?
