At present era, teachers must not hate pupils or fighting with pupils. Because one of the main reasons is most of pupil who started studying at school this year, they will be very young and scared from everything. if teacher hate or give a strong punishment, they start losing their interests or active position. So that teachers should be more and more careful when they are teaching or chatting with their pupils. Moreover, in each lesson teachers should give motivation to enhance pupils active position or social skill. On the other hand, we had this kind of situation that decrease pupils' effectiveness and wants. For example, we had a phrase that "Every coin has two sides" so what I want mention is that both of them (teacher & pupil) made a mistake at the lesson. First of all, it is true pupil made a mistake from the subject or destroy the lesson with other work, teacher may give him little punishment at the lesson. but he must not hate in the middle of the classmates because this kind of work may decrease pupil's self-awareness and self-esteem. So that teacher should give a punishment in outdoor of the class not in the middle. Second off all, mother also made a mistake because she should hear also teacher what was in that condition and why teacher hated her child not in the middle of the pupils only in teachers' room or outdoor of the class. because this is may destroy self- respect. to sum up both of mother and teacher should make a contract with each other do not repeat this kind of situation and if ot repeat they will contact with director of the school.
